quartz, granite, scheelite,
jasper

A Rare Gem

Northern Territory Fossicking Lease For Sale

- A sedimentary opalite fossicking project for sale that has attracted geologists from all corners of the globe.
- From those hunting opals for lapidary purpose to those wanting an understanding of the deeper volcanic geology through exploring the exposed dormant hydrothermal fissures and zones of mineralisation for gold, this is an exciting project for acquisition for genuinely interested parties.
- This lease has been used over the years to run fossicking and panning tours and is held under 100% ownership by a single party. The deeper geology is waiting to be explored with surface sample assays producing enticing results.
- Located 60Km southwest of Pine Creek and accessible from the main highway and tracks via 4WD and foot.
