Updated tenement register provision on request	✓
Rates, fees and notices for government and environmental bodies	✓
Preparation and lodgement of tenement variations to expenditure and exploration activity covenants, Form 5 (WA), partial reductions (including preparation of associated maps), and full relinquishments	✓
Management of Environmental Authority, Health and Safety and Royalty Returns	✓
Review and lodgement of statutory technical reports	✓
Regular access to state-specific moratorium maps	✓
Administration of all tenement related correspondence including Notice of Entry	✓
Regular auditing of obligation dates, statutory requirements, and tenement boundaries on government databases	✓
Government department liaison	✓
Advice and interpretation of mining, extractive and exploration legislation	✓
Priority notification on changes to state legislation, funding initiatives and key industry news	✓

Additional Services*

Tenement Management

Advertising	NSW and VIC have specific requirements and processes for advertising new applications in both state and local newspapers.
Applications	Preparation of applications which can include drafting maps, work programs, environmental and community consultation programs, lodging all documentation and liaising with government departments.
Dealings (including joint ventures)	AMETS can take care of all matters relating to dealings, including but not limited to caveats, the registration of joint venture agreements and the registration of agreements.
Landowner Liaison	AMETS can liaise and correspond with all landowners who are related to your project. This includes land access, compensation, negotiation, and department discussions.
Native Title	All matters relating to native title, including compensation, department correspondence and liaising with affected parties.
Objections	Dealing with objections to applications received from landowners or the public.
Planning Permits	Preparation, lodging and amendments to planning permits.
Renewals	Includes preparation and lodgment of renewal applications with the assistance of supporting documentation from the client.
Transfers	AMETS can liaise with all parties and Government departments to ensure the transfer processes smoothly until completion.

GeoServices

Cartography	Presentation of spatial information such as tenements, work programs and regional features on maps and plans.
Data Interpolation	Geological data interpolation, not limited to cross-sections, graphical borehole logs, and heat maps.
Historical Data Management	Includes, but not limited to, the collation, packaging, and summation of legacy datasets applicable to a nominated area by the client.
Monitoring and Moratorium Mapping	AMETS distribute weekly, fortnightly, and monthly maps of available or soon-to-be available ground in each state and territory. Our team of geologists can produce highly detailed and specific maps allowing you to monitor ground you are interested in.
Rehabilitation Reports	Includes the preparation and lodgment of necessary documentation relating to rehabilitation of ground disturbance.
Technical Reports	AMETS can assist with the preparation and lodging of annual statutory reports, as well as provide regular schedules for their due dates. We also advise our clients of any changes to the prescribed guidelines for each state.

Project Services

Due Diligence	AMETS provide different levels of Due Diligence reports from simple status reports of tenements to more complex reports required for acquisitions and Prospectus'. These reports identify more than a status report, identifying current and future liabilities, native title affected land, landowner agreements and possible long-term issues.
Regional Project Assessment	Includes an assessment of open file data, tenement status, regional development plans, cultural, social, and environmental constraints. This report is applicable to a nominated area by the client.
Mergers & Acquisition Advertising	Includes the preparation and hosting of an advertisement for project/commodity acquisition or sale through our website, client base and media channels.
Works Approvals (inc. drilling approvals)	This includes the preparation and lodgment of all documents relating to approvals for exploration work, including drilling activity.

*Services as required in addition to standard management of granted titles. These are available at an additional fee to your tenement management base package.
