JAMIESON PROJECT

ADVANCED GOLD-COPPER - VIC

- ✓ Covering approximately **96km²** across **two granted exploration tenements** situated on unrestricted crown land within state forest in the Northeast Victorian Goldfields.
- ✓ **Hill 800 target hosts an advanced gold-copper system**, with wide, high-grade intervals including **92.7m @ 3.29g/t Au from 2.3m** and **2m @ 74.8g/t Au, 0.4% CU from 290m**, demonstrating strong potential for a near-term Mineral Resource.
- ✓ **Large-scale porphyry copper-gold signature** supported by strong geochemical pathfinders (Bi-Te-SE) and several high-priority magnetic anomalies, with five targets drilled to date showing outer-porphyry alteration zones.
- ✓ **Rhyolite Creek target hosts significant zinc-gold-silver mineralisation**, including **46m @ 1.11% Zn with 1.4m @ 15.6% Zn, 7.4g/t Au, 113g/t Ag**, alongside a 500m x 500m Au-Cu soil anomaly that remains sparsely drilled.
- ✓ **Multiple additional gold targets within 1km of Hill 800**, with rock chips up to **4.74g/t Au** and extensive gossanous alteration zones, highlighting strong district-scale mineralisation potential.
- ✓ **Strategic position within the Mt Useful Slate Belt**, an emerging epithermal-porphyry corridor with historic antimony and mercury workings offering further underexplored potential.
