JOINT VENTURE **OPPORTUNITY**

Deep8Mining

WYLOO PROJECT

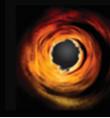

WESTERN AUSTRALIA

OVERVIEW

- **Deep 8 Mining Pty Ltd** is seeking a Joint Venture Partner in relation to the Wyloo Project, prospective for gold and base-metals.
- The Wyloo Project features E08/3136, of good standing, covering an area of 9 Blocks.
- The Project lies approximately 100km east of Nanutarra and 120km west of Paraburdoo, accessible via the sealed Nanutarra-Paraburdoo Highway.

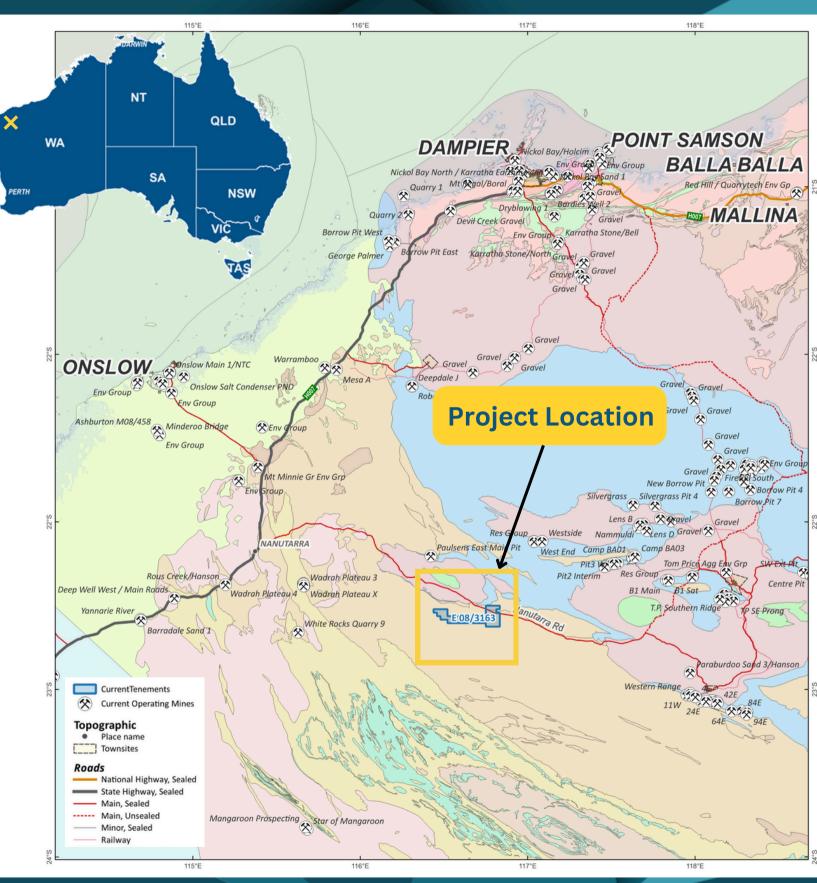

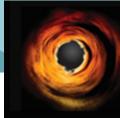

Deep8Mining

TENEMENTS 8 GEOSERVICES

AMETS

- 30 kms North-West.

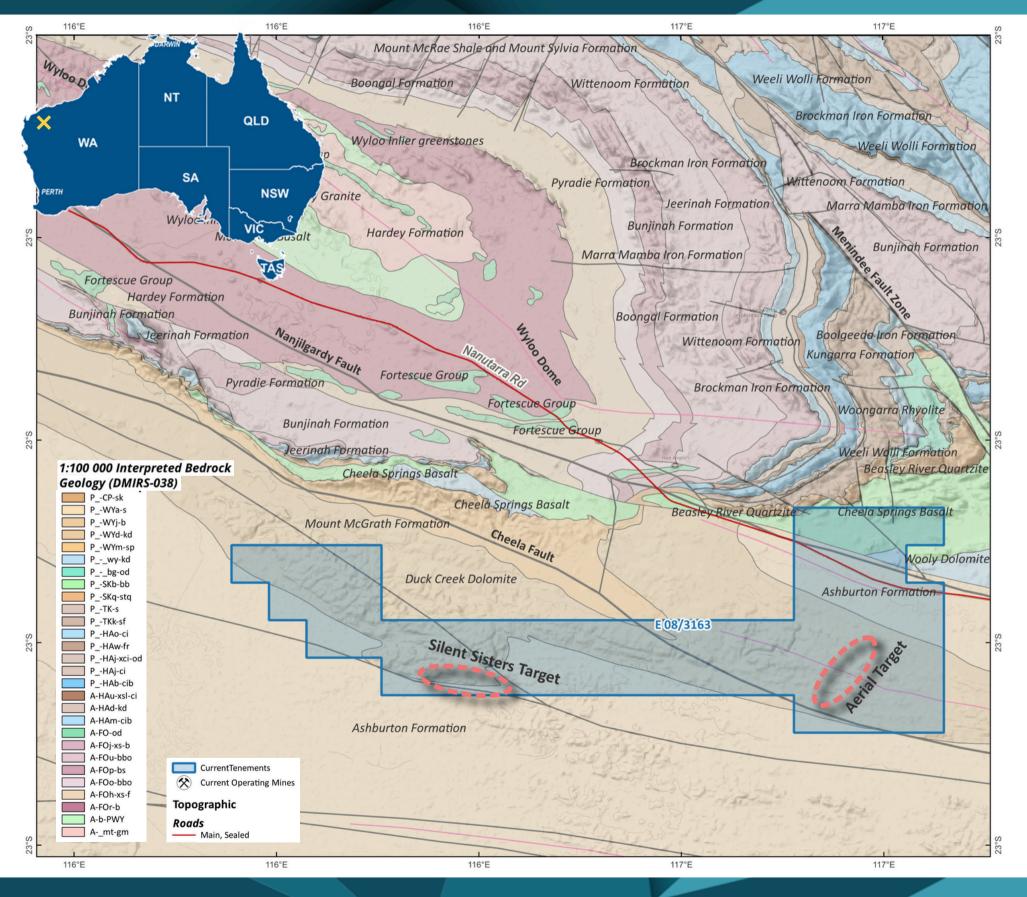

Deep8Mining

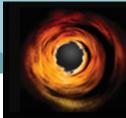

• The Project has proximity to existing mining infrastructure such as the Black Cat Syndicate Ltd's Paulsens Gold Mine,

• The area is characterised by significant historical mining sites.

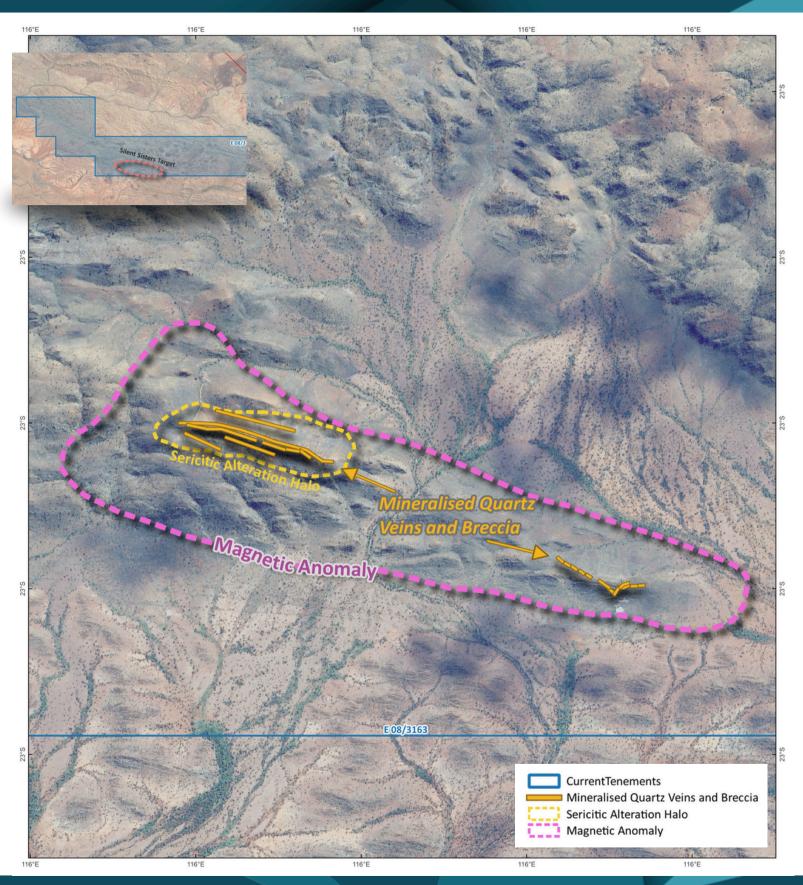

Deep8Mining

• The **Wyloo Project** is prospective for gold and base metals within the Duck Creek Formation, with magnetic anomalies as yet undrilled.

• The Project is situated in a geologically favourable area with surface geochemical anomalies, proximity to the Nanjilgardy Fault complex, rich with gold, silver, zinc, and **copper**, and historic silver-lead mining sites.

SILENT SISTERS

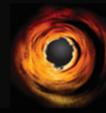

Geologically, the **Silent Sisters Prospect** is favourably positioned on the southern flank of the Wyloo Dome, which is conducive to the migration of mineralizing fluids.

The prospect hosts **high-grade** galena (silver-lead) veins and **breccia** that extend over a length of approximately 2 kilometres, correlating with a notable magnetic anomaly in the region.

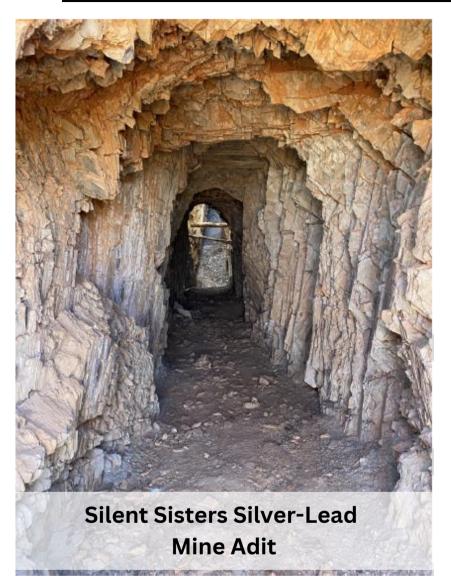

TENEMENTS & GEOSERVICES

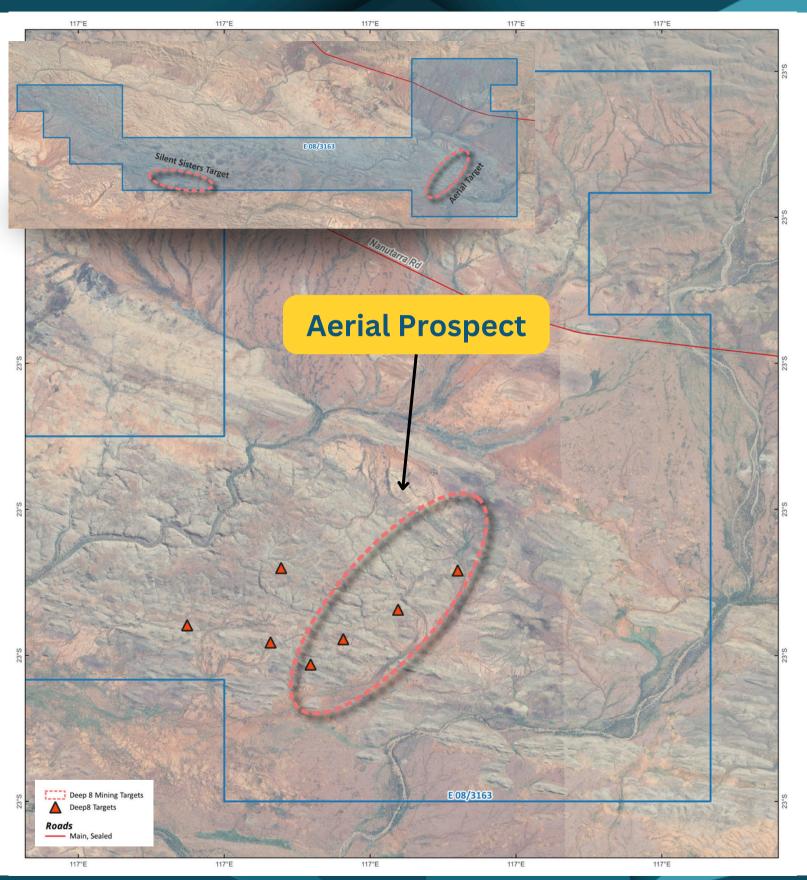

AMETS

Historical exploration has been conducted on this prospect and includes assay results of up to 8.75 ppm gold, 15.9% lead, and 16.5 **ppm silver**, hosted within Quartz-dolomite-galena breccia.

Deep8Mining

AERIAL PROSPECT

- copper and silver.
- the Aerial Prospect.
- unavailable.

AMETS

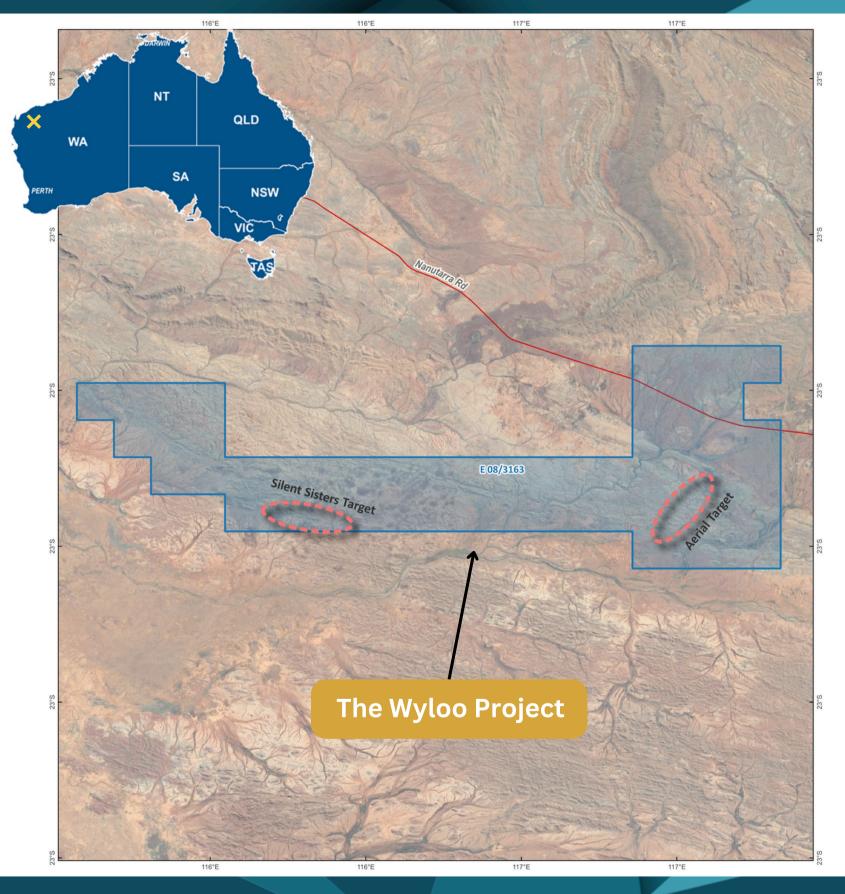

• Highly prospective historic exploration, has indicated significant potential for **gold**, **lead**,

• Historical exploration also includes geochemical and soil surveys, and rock chip sampling, which have delineated further anomalies in the vicinity of

• Diamond drilling was conducted in the early 1970's. However, detailed drilling data is

AMETS

E08/3163.
